

OUR GEOTHERMAL SOLUTIONS ARE:

We pride ourselves not only in being part of a more sustainable future, but also in doing this while creating Canadian jobs and supporting our Alberta Oil & Gas workers. To highlight:

NORDIC GEOTHERMAL HEAT PUMPS: We exclusively use the Nordic® Geothermal heat pumps for our installations. Made in New Brunswick, Maritime Geothermal has been manufacturing geothermal heat pumps since the 1980's. With their own fully CSA Certified Test Lab onsite, Maritime Geothermal is Canada's leader in heat pump manufacturing. Residential geothermal heat pumps come standard with 10-year manufacturer's warranty on all major refrigeration components, including compressor.

BDC – Bertram Drilling Corp: Founded in 1962 in Carbon, Alberta, Bertram Drilling Corp is a diversified specialty drilling company serving an array of customers, primarily in the energy industry. BDC and Thermal Creek have been partners for years when it comes to the delivery of vertical geothermal borehole installations. In 2018 BDC and Thermal Creek managed and delivered Alberta largest district geothermal energy field in Edmonton for the Blatchford redevelopment. The field consisted of 570 boreholes, drilled to almost 500ft deep each.

INTERNATIONAL PIPE: Based out of Selkirk, MB, International Pipe has been a 12-year long trusted supplier of Thermal Creek for the geothermal ground loop materials. International Pipe specializes in HDPE products and produces some of the best quality geothermal CSA448 certified pipe and loops. International Pipe is ISO9001-2008 certified, which is currently the highest designation available within their trade. The HDPE pipe products from International Pipe come with a 50-year limited manufacturer's warranty.
